

Red Condor Hosted Archive Service

Affordable, Reliable, Scalable and Secure

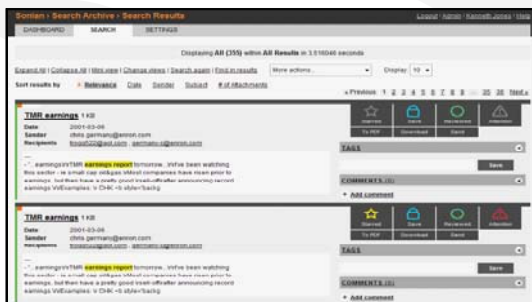

Red Condor Archive provides an affordable, reliable and secure hosted Email Archiving Service to customers of all sizes to help you meet your compliance, litigation support, storage management or best practice requirements. Red Condor Archive leverages a global cloud computer and storage infrastructure to provide your organization with an extremely scalable, 100% software-free service, at an industry low price point. Red Condor Archive's data collection technology supports all messaging systems (Microsoft, Novell, IBM, Zimbra, Scalix, IMail Server, Mailtrust, Keiro and many more) making the solution truly future-proof.

Automatic Back-Up of Messages & Attachments: With Red Condor Archive, you'll capture all inbound and outbound messages and maintain a secure and tamper-proof copy of all business correspondence. Plus, you can completely set-up and configure your archive in just minutes with a few simple clicks.

Lifetime Retention with Unlimited Storage: With Red Condor Archive, there are never any hidden fees and all our subscription plans include unlimited storage. Remove the strain on your email servers without expensive hardware. Allow users to delete email with the knowledge that any items can be retrieved from the archive if needed later.

Advanced Search and Discovery

- Add Comments • Export Results • Legal Hold
- Tag Keywords • Flag for Review

Powerful Search & Retrieval

At All Times: Red Condor Archive keeps all data online and immediately accessible for searches. Other hosted archive vendors migrate your older data to offline or near-line storage systems, dramatically increasing the amount of time required to search. You'll be able to search, retrieve and export messages and attachments in seconds by keyword, sender or recipient, date range and more.

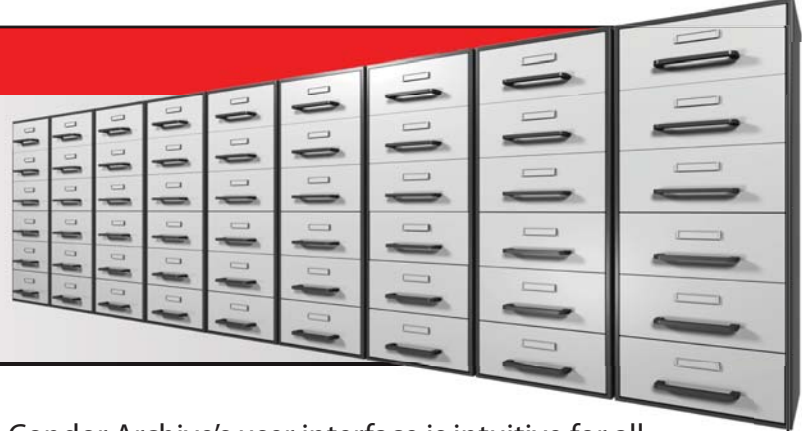

Reliable, Redundant Data: With Red Condor Archive, all archived data is replicated across multiple data centers. SSL encryption and adherence to DoD AES standards ensure that no data is accessible in clear-text. All email messages can be reliably retrieved solving business contingency issues relating to archiving.

Red Condor Archive includes:

- Archiving of all inbound and outbound messages
- Unlimited storage for an unlimited time at no additional cost
- All data searchable at all times
- Easy data capture
- Advanced search and discovery
- Immediate search capability
- Preservation of data
- Easy to use interface
- Instant set-up
- Replication to multiple data centers
- Role-based Administration Dashboard
- Individual End User search
- Technical support
- Supports all messaging systems

Red Condor Hosted Archive Service

Affordable, Reliable, Scalable and Secure

Ease of Use for Administrators and End Users: Red Condor Archive's user interface is intuitive for all skill set levels. Administrators use self-service web UI's to configure the system without the need for systems engineers. Your organization can stay focused on your core business without being distracted by infrastructure hassles.

Supports All Major Messaging Environments

Red Condor Archive supports all major messaging infrastructures including, but not limited to:

- IBM Lotus Notes
- Novell GroupWise 6.5.1, 7.x and 8.x
- Microsoft Exchange 2000, 2003 and 2007
- IMail Server
- Mailtrust
- Scalix
- Zimbra
- Kerio
- And more...

Flexible End User Access

- Instant Search
- Unique File View
- Export email
- Business continuity

Satisfy E-Discovery and Compliance Challenges

Red Condor Archive helps your organization be compliant with archiving regulations for SEC, FINRA, NASD, HIPAA, Sarbanes-Oxley, Gramm-Leach-Bliley, and more. With secure capturing and full text indexing of all emails and attachments, compliance requests can be fulfilled quickly and easily. Securely capture, index and store multiple copies of auditable email for easy retrieval through our easy-to-use search and discovery interface.

Establish a Corporate Knowledge Management System

The Red Condor Archive system is designed to accommodate compliance archiving as well as storage resource management. You can archive everything for all users - all inbound and outbound messages. With Red Condor Archive, you can audit employee email for harassment, improper disclosure, sharing of confidential data, and more. Easily monitor email activity to ensure compliance with corporate policy or regulations.

Offload Message Storage from Mail Server

Tired of an endlessly growing storage problem with your email as your organization grows and time passes? Red Condor Archive can help. Reduce the amount of email on your servers and declutter inboxes with total peace of mind. With Red Condor Archive, you get unlimited storage at no additional cost.
